

Substituted sulfonylamino(thio)carbonyl compounds

2091

A b s t r a c t

The invention relates to novel sulfonylamino(thio)carbonyl compounds of the formula (I),

in which

n represents the numbers 0, 1 or 2,

A represents a single bond, or oxygen or sulfur, or the grouping N-R, in which R represents hydrogen, alkyl, alkenyl, alkynyl or cycloalkyl,

Q represents oxygen or sulfur,

R¹ represents hydrogen or formyl, or represents respectively optionally substituted alkyl, alkoxy, alkylamino, alkoxyamino, dialkylamino, N-alkoxy-N-alkyl-amino, alkylcarbonyl, alkoxy carbonyl, alkylsulfonyl, alkenyl, alkynyl, cycloalkyl, cycloalkylcarbonyl or cycloalkylsulfonyl,

R² represents cyano or halogen, or represents respectively optionally substituted alkyl, alkoxy, alkylthio, alkylsulfinyl, alkylsulfonyl, dialkylaminosulfonyl, alkenyl, alkynyl, alkenyloxy or alkynyloxy, and

R³ represents respectively optionally substituted heterocyclyl having 5 ring members of which at least one is oxygen, sulfur or nitrogen and from one to

09194251-051399

three further ring members can be nitrogen,

and salts of compounds of the formula (I), a plurality of processes and novel intermediates for preparing them and their use as herbicides.
